Warrior Met Coal Provides Update on Third-Party Facility Incident

Nov 18, 2026

BROOKWOOD, Ala.--(BUSINESS WIRE)-- Warrior Met Coal, Inc. (NYSE:HCC) (“Warrior” or the “Company”) today confirmed that a surface fire occurred Tuesday, November 17, 2026, at a third party-owned and operated ultra-fines coal recovery pilot plant located on the Company’s Mine 7 West property.

The fire was contained, and the third-party facility and surrounding surface operations were evacuated as a precaution.

The incident was isolated to the third-party facility and had no impact on Warrior’s mining operations. The Company’s Mine 7, Mine 4 and Blue Creek operations are all fully operational and mining.

Safety remains a top priority for Warrior, and the Company remains committed to maintaining a safe working environment for its employees, contractors, vendors and surrounding communities.

About Warrior

Warrior is a U.S.-based, environmentally, and socially minded supplier to the global steel industry. It is dedicated entirely to mining non-thermal metallurgical (met) coal used as a critical component of steel production by metal manufacturers in Europe, South America, and Asia. Warrior is a large-scale, low-cost producer and exporter of premium met coal, also known as hard coking coal (“HCC”), operating highly efficient longwall operations in its underground mines based in Alabama. The HCC that Warrior produces from the Blue Creek coal seam contains very low sulfur, has strong coking properties and is of a similar quality to coal referred to as the premium HCC produced in Australia. The premium nature of Warrior’s HCC makes it ideally suited as a base feed coal for steel makers and results in price realizations near the Platts Premium LV FOB Index price.
